Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Proc. Natl. Acad. Sci. U.S.A. 98:9877-9882(2001).
-I- FUNCTION: Synthesizes alpha-1.4-glucan chains using ADP-glucose.
-I- CATALYTIC ACTIVITY: ADP-glucose + {(1,4)-alpha-D-glucosyl}{N} =
ADP + {(1,4)-alpha-D-glucosyl}{N+1}.
-I- PATHMAY: Glycogen biosynthesis; second step.
-I- SIMILARITY: BELONGS TO THE BACTERIAL/PLANT GLYCOGEN SYNTHASE

CYCLASE ACTIVITY ON BINDING OF ANF.
CYCLASE ACTIVITY ON BINDING OF ANF.
CATALYTIC ACTIVITY: GTP = 3',5'-cycllic GMP + diphosphate.
SUBCELLULAR LOCATION: Type I membrane protein.
I MISCELLANEOUS: THERE SEEM TO BE AT LEAST THREE ANP RECEPTORS WITH GUANYLATE CYCLASE ACTIVITY (ANP-A AND ANP-B) AND ONE (#MICH IS PROBABLY RESPONSIBLE FOR THE CLEARANCE OF ANP FROM CIRCULATION WITHOUT A ROLE IN SIGNAL TRANSDUCTION.
SIMILARITY: SOME SIMILARITY WITH CONSERVED REGION OF CATALYT DOMAIN OF PROTEIN KINASES.
I- SIMILARITY: BELONGS TO ADENYLYL CYCLASE CLASS-4/GUANYLYL CYCEAMILY.
                                                                                                                                                                                                                                                                                          TRANSMEM

  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                  DB
